Community Champions

Congratulations to Rachel who successfully completed the Winter Walk Half Marathon! Rachel dedicated her half marathon to her son Toby who has been under the care of St Mark's for Peutz-Jeghers Syndrome since the age of six. In Rachel's own words: *"Living with this would be impossible without the dedicated care and expertise of his team of Surgeons, Consultants, and support staff at St Mark's. Toby lives a relatively normal life thanks to the amazing care he receives. We know we are in the safest hands possible and, as a mother, I simply cannot put a price on the reassurance this gives us."*

Thank you to everyone who has undertaken a Facebook fundraiser in aid of St Mark's, in January alone, our fantastic Facebook fundraisers raised a combined total of £255 which will help support research, education & innovation at the hospital.

As we bid farewell to Amazon Smile, the entire fundraising team wants to thank everyone who supported us via Amazon Smile over the years. Since December 2021, we have received an impressive £500 in donations!

This month we received £25 in donations from easyfundraising and this is thanks to the amazing people who support us each time they shop! If you've not signed up yet, it's easy to do and makes a huge difference. Plus, once you've raised your first £5, easyfundraising will double it! Over 7,000 brands will donate to us for free when you shop with them via easyfundraising such as John Lewis, Argos, Just Eat, Booking.com and more. [Don't delay, sign up today!](#)

Since 1835, research has been an integral part of St Mark's and, thanks to philanthropic support, our specialist clinicians have been able to continually push the frontiers of treatment for complex bowel diseases. Through understanding that bowel diseases are unique to the individual, as unique as a fingerprint, St Mark's is moving towards a future where individualised treatments can be offered to patients, tailored to their specific needs, transforming their outcomes. By continuing to support our transformative research, you have the power to make a meaningful and measurable difference working towards a future where patients can benefit from personalised medicine, surgery, and endoscopy.
